Contents Vol. 24, 1986–87

The behaviour of mise-à-la-masse anomalies near a vertical contact
E.H. Eloranta (Espoo, Finland) 1
Electrical potential due to a point current source over a layered conducting earth with dipping anisotropy
B.P. Pal and K. Muherjee (Calcutta, India) 15
On electromagnetic coupling "removal" from induced polarization surveys
J.R. Wait and T.P. Gruszka (Tucson, Ariz., U.S.A.) 21
Topographic distortions of transient electromagnetic anomalies in resistive terrains
R.D. Ogilvy (Keyworth, United Kingdom) 29
Characteristics of inline and broadside transient electromagnetic anomalies
R.D. Ogilvy and Z.K. Dabek (Keyworth, United Kingdom) 43
The use of the subtended solid angle for calculating the magnetic anomaly over structurally complex bodies
R. Green (Armidale, N.S.W., Australia) 61
A method of reducing the lateral effects in Schlumberger geosounding
Tang Muoi (Warsaw, Poland) 71
Book Reviews
Gravimetrie und Magnetik, by H. Militzer and F. Weber (Editors) — S. Plaumann 81
The Polarization Method of Seismic Exploration, by E.I. Gal'perin — J.W.J. Hosken 82
Fossil Fuel Biomarkers; Applications and Spectra, by R.P. Philp — H.L. ten Haven 83

Announcement 85
Frequency-domain reduction of potential field measurements to a horizontal plane
F. Guspí (Rosario, Argentina) 87
Field investigation of a Macedonian tumulus by resistivity soundings
G.N. Tsokas and A.Ch. Rocca (Thessaloniki, Greece) 99
Terrain correction for gravity measurements, using a digital terrain model (DTM)
A.C.R. Ketelaar (Utrecht, The Netherlands) 109
Numerical modelling of deep DC-soundings
L.L. Vanyan, T.A. Demidova, I.V. Egorov and N.A. Palshin (Moscow, U.S.S.R.) 125
Effect of transmitter turn-off time on transient soundings
D.V. Fitterman and W.L. Anderson (Denver, Colo., U.S.A.) 131
A computer algorithm for automatic picking of refraction first-arrival time
R. Ramananantoandro and N. Bernitsas (Athens, Ohio, U.S.A.) 147
Interpretation of I.P. time domain/resistivity soundings for delineating sea-water intrusions in some coastal areas of the northeast of Spain
J.L. Seara and A. Granda (Madrid, Spain) 153
Determination of the low-frequency spectrum and the late stage of the transient caused by currents induced in a confined conductor as Neumann's problem
A.A. Kaufman (Luleå, Sweden) 169
Book Review
Frequency and Transient Soundings, by A.A. Kaufman and G.V. Keller — D.S. Parasnis 181

Line sources for seismic modeling by finite differences in inhomogeneous media
R. Sun and G.A. McMechan (Richardson, Tex., U.S.A.) 183
Seismic response analysis of the foundation area in the Acheloos river dam (Central Greece) as determined from a seismic refraction survey and the boundary-element method
G.-A. Tselentis, C. Thanassoulas and G. Stavrakakis (Athens, Greece) 197
Size determination of slab-like ore bodies – an interpretation scheme for single-hole mise-à-la-masse anomalies
A. Bowker (Leicester, Great Britain) 207

A macroscopic physical model for the self-potential of a sulphide deposit
L. Eskola and H. Hongisto (Espoo, Finland) 219
Location of sub-surface geoelectric anomalies for archaeological work: A comparison between experimental arrays and interpretation using numerical methods
L. Orlando, S. Piro and L. Versino (Rome, Italy) 227
Discussions
Rapid gravity interpretation by nomograms - A discussion
R. Nagendra (Birmingham, Great Britain) 239
Parallel and perpendicular electric field components of a lightning discharge - A discussion
P.P. Pathak (Hardwar, India) 243
- A Reply
Diviya and J. Rai (Roorkee, India) 246

Abstracts of papers submitted at the Meeting of the Nordic Association for Applied Geophysics, Trondheim, Norway, January 12–14, 1987 253
Preface 283
Coal seam mapping by underground in-seam seismic surveys
P.J. Hatherly (North Ryde, N.S.W., Australia) 285
In-seam seismic detection of geological structures
R.G. Wilson (West Wollongong, N.S.W., Australia) 295
Geotomography for the delineation of coal seam structure
P.G. Rogers (Epping, N.S.W., Australia), S.A. Edwards (Clayton, Vic., Australia), J.A. Young (North Ryde, N.S.W., Australia) and M. Downey (Shortland, N.S.W., Australia) 301
A multifunction sonde for horizontal borehole logging
M.T. Gladwin, D. Rowlands and J. Leven (St. Lucia, Qld., Australia) 329
Underground rock-noise monitoring at No. 2 Mine, Collinsville
B.B. Beamish (Auckland, New Zealand) and B.M. McKavanagh (Rockhampton, Qld., Australia) 347
Cindered coal detection using transient electromagnetic methods
A. King (Sydney, N.S.W., Australia) 367
Estimation of coal measures rock strength using sonic and neutron logs
G.H. McNally (North Ryde, N.S.W., Australia) 381
High resolution seismic reflection surveys for coal
D. Palmer (Sydney, N.S.W., Australia) 397
Coal seam structure delineation by downhole–crosshole seismic methods
L.V. Hawkins†, P. Wootton (Sydney, N.S.W., Australia) and W.H. Holmes (Kensington, N.S.W., Australia) 409
Coal seam mapping by analysis of direct channel wave arrivals
P.J. Hatherly, P. Hornby and P.F. Irwin (North Ryde, N.S.W., Australia) 421
Modeling and analysis of direct-current electrical resistivity in the Durham Triassic basin, North Carolina
C.E. Brown (Reston, Va., U.S.A.) 429
Electromagnetic sounding in the resistive limit and the Backus-Gilbert method for estimating averages
F.J. Esparza and E. Gómez-Treviño (Ensenada, Baja California, Mexico) 441
Mise-à-la masse modelling by integral equation with the continuity equation as a constraint
H. Soininen (Espoo, Finland) 455
Contribution of the quantitative interpretation of gamma-ray logs to the study of limestone exploitation, a case-study at Maizeret, Belgium
I. Halleux (Liège, Belgium) 461
Delineation of gold-bearing hydrothermally altered rocks using gravity data — a New Zealand example
C.A. Locke (Auckland, New Zealand) and C.E.J. de Ronde (Toronto, Ont., Canada) 471

Geoelectrical response of cavities in limestones: An experimental field study from Kurnool District, Andhra Pradesh, India
P.C. Chandra, S. Tata and K.C.B. Raju (Hyderabad, India) 483
Multiple dynamic matching: a new approach to well log correlation
W.S.P. Leaney and T.J. Ulrych (Vancouver, B.C., Canada) 503
Trace elements in the geogas and their relation to bedrock composition
K. Kristiansson and L. Malmqvist (Lund, Sweden) 517
An appraisal of the Turan EM technique for uranium exploration — a case-study from Umra, Rajasthan, India
B.N. Rao, R. Srinivas and K.B. Anantharaman (Hyderabad, India) 535
A simple approach to the masked-layer problem in seismic refraction work
P.R. Pant (Calcutta, India) and M.S. Vijaya Raghava (Hyderabad, India) 549
Book Reviews
Designing Optimal Strategies for Mineral Exploration, by J.G. DeGeoffroy and T.K. Wignall — L.G. Closs 557
Angewandte Geophysik, Band 2. Geoelektrik — Geothermik — Radiometrie — Aerogeophysik, by H. Militzer and F. Weber (Editors) — E. Klingele 558
The Structural Analysis of Granitic Rocks, by J. Marre — N.J. Price 559
